

16-2 Glossary Dutch-English

| | |
|---|---|
| afschrijving en rente | depreciation, interest, maintenance and repair 11-5 |
| afsluiter | valve |
| adapter ter bevestiging van een tand | adaptor 2-1-8 / 2-1-17 |
| agitatiebaggeren | agitation dredging 1-8 |
| airlift pomp | air-lift 5-1 |
| baggermaterieel | dredger types 1-1 |
| baggermerk | dredging mark 2-2-8 |
| baggerproces | dredging process 1-12 |
| baggerprojecten | dredging projects 3-1 |
| baggerschepen | dredgers 2-1-1 |
| baggerwiel | dredge wheel 1-5 |
| beladen sleepzuiger | loading a trailing suction dredger 6-3 |
| belasting boven op een zandlichaam | surcharge 15-2 |
| beladingsgraad | degree of loading D 6-8 |
| belastingsnelheid rots | loading rate rock: influence of 4-4-7 |
| beun ontwerp | hopper design. 6-16 |
| beunbelasting | hopperload parameter 6-10 |
| beunmassa / - volume | hopper: mass and volume of the hopper contents 6-7 |
| beweging van een sleephopperzuiger | motion of a trailing suction hopper dredger 12-4 |
| beweging van een snijkopzuiger | motion of a cutter suction dredger 12-5 |
| bezink efficiency van beun | hopper efficiency 6-9 |
| bezink basin | settling pond 15-9 |
| bezinken | settling definitions and concepts 6-7 |
| bezinking | Settling : computational models of hopper settling process 6-19 |
| bezinking: beperking bezinking doorconcentratie | settling: hindered settling by concentration 6-11 |
| bezinkproces in beun | hopper settling process 6-9 |
| bezwijkgedrag rots | rock failure behaviour 4-5-5 |
| Bingham vloeistof | Bingham fluid in laminar zone 5-68 |
| bladhoeken | blade angles β pump 5-20 |
| bodemdiepte statistiek "Conditional Mean" | Bottom depth statistics "Conditional Mean" 10-7 |
| boegschroeven | bow thrusters 2-2-1 |
| botheid | bluntness 2-1-12 |
| box anker | box anchor 2-1-15 |
| brandstfoverbruik | fuel consumption 2-2-3 / 5-33 |
| brandstof | fuel: costs for fuel and lubricants 11-8 |
| bressen van zand | breaching of sand 4-2-1 |
| brokvormend snijproces klei | fragment forming cutting process clay 4-3-3 |
| brosheid van rots | brittleness of rock 4-4-5 |
| Bruhl: effect fijne fractie | Bruhl: effect of fine fraction on pipeline resistance 5-78 |
| caviteatie | cavitation 5-26 |
| caviteatie zone in gesneden schil zand | cavitation zone in cut layer of sand 4-1-15 |
| centrifugaal baggerpomp | centrifugal dredge pump 5-2 |
| classificatie systemen | classification systems 7-10 |
| concentratie | concentration 5-61 |
| constant vermogen | constant power: characteristic for constant power drive 5-3-1 |
| constant volume/tonnage laadsystemen | constant volume cvs versus constant tonnage cts 6-15 |
| correlatie | correlation of soil parameters 7-19 |
| cyclicsoptimalisatie | optimising cycle production hopper 6-5 |
| deiningscompensator | swell compensator 2-2-2 |
| dichtheid | density 7-2 |
| dichtheid zand in hopper | density of the settled sand in hopper 6-8 |
| dichtheidsmeting in haven modder bodem | density measurement in harbour mud 8-17 |
| dichtheidsmeting in pijpleiding | Density meter in pipeline 2-2-6 |
| dichtheidsstroom onderaan bres | mixture flow behaviour at the toe of the slope 4-2-17 |
| diepte meting | depth measurement 8-12 |
| dieptemeting | accuracy. depth measurement 8-12 |
| diesel: karakteristiek diesel directe aandrijving | diesel: characteristic for diesel driven pump 5-36 |
| dieselmotor | diesel engine 5-33 |
| diffusor: verdrunken stortgoot | diffusor: close submerged with siphon effect 6-17 |

16-2 Glossary Dutch-English

| | |
|--|--|
| dilatantie | dilatancy 4-1-5 |
| dimensioze kentallen | dimensionless indicators 13-4 |
| doorlatendheid | permeability sand 4-1-6 and 13-6 |
| draad schijf | pulley |
| draaistroommotor | rotary current motor 5-46 |
| drivende leiding | floating pipeline 15-14 |
| druksterkte | compressive strength |
| Durand: leidingweerstand formule | Durand: pipeline resistance formula 5-72 |
| dustpan zuigmond | dustpan suction mouth 3-2 |
| dynamische grondmechanica | dynamic soil mechanics 1-16 |
| dynamische grondmechanica | dynamic soil mechanics 7-5 |
| echo lood | echo sounder 8-13 |
| eenheden in baggerindustrie | units in the dredging industry 1-12 |
| ejecteurpomp / waterstraalpomp | ejector 5-5 |
| elektrische as | electrical shaft 5-32 |
| elektrische motor | electrical motor 5-42 |
| emmerbaggernmolen | bucket dredger 1-2 |
| equivalente leidinglengte | equivalent resistance length 5-65 |
| erosie en sedimentatie op de bres | erosion and sedimentation on the breach 4-2-12 |
| erosie/pick-up functie van van Rijn (1993) | erosion/pick-up function according to van Rijn (1993) 4-2-14 |
| erosiesnelheid bij hoge v; van Rhee (2010) | erosion velocity at high v according to van Rhee (2010) 4-2-19 |
| Erosiesnelheid formules | erosion velocity formula's 4-2-17 and 4-2-21 and 4-2-22 |
| erosie van zand | erosion of sand 4-2-1 |
| erosie/pick-up functie voor 1-3 m/s | erosion/pick-up function for 1-3 m/s 4-2-16 |
| fijn zand gehalte | silt content /proportion of fines 7-9 |
| fijne delen uitspoelen | fines , washing out of 15-4 |
| Führböter: leidingweerstand formule | Führböter : pipeline resistance according to führböter 5-79 |
| gelijkvormigheid | similarity: geometrical and dynamic similarity 13-3 |
| gescheurdheid en verwering | fracture state and weathering 7-15 |
| golfgegevens | wave data 12-2 |
| golfhoogtes en stroomsnelheden | workable wave heights and flow velocities dredgers 12-7 |
| gps en dgps plaatsbepaling | gps and dgps positoning fixing 8-7 |
| grondmechanische aspecten baggerprocessen | soil mechanical aspects of dredging 7-1 |
| grondparameters | soil parameters relevant for dredging processes 7-1 |
| gruisspanning | gritstress 4-4-9 |
| hardfacing, gebruik voor scherp mes | hardfacing , use to sharpen blade 4-1-8 |
| hard metalen bit | hard metal insert (Bit) 2-1-20 |
| helling bresproces | slope: breaching process on a slope at angle β 4-2-5 |
| hevelwerking | syphon effect 6-17 |
| hoek van inwendige wrijving | angle of friction between soil and steel 4-1-6 |
| homogeen | homogeneous turbulent flow 5-64 |
| hydraulisch opvoeren en transporteren | hydraulic lifting and transporting 5-1 |
| ideaal bezinkbassin | ideal settling basin 6-19 |
| inscheren (van een draad) | reeve (a cable) |
| inspectie luik/deksel | hatch for inspection |
| Jufin: leidingweerstand formule | Jufin: pipeline resistance according to jufin-lopatin 5-75 |
| kalkgehalte | calcium content and calcareous sand 7-7 |
| karakteristieken centrifugaalpomp | characteristics of a centrifugal pump 5-8 |
| kegelplaat met zuigmond voor cutter | cone plate with suction mouth for cutter |
| klei snijden | clay: cutting process in clay 4-3-1 |
| klei snijden | cutting clay 4-3-1 |
| kleiballen | clay balls: example calculation pipeline resistance 5-86 |
| Koning de: dichtheidsstroommodel | Koning's (de) density flow model 6-25 |
| korreldiameter | grain diameter characteristic 5-59 |
| korrelgrootte | grain size influence on pump characteristics 5-23 |
| korrelgrootte classificatie | grain size classification on grain size 7-11 |
| korrelspanning | grain stresses and hydrostatic pressures 7-5 |
| kosten posten | cost items in the proposal 11-3 |
| kostprijsberekening | cost estimating for dredging projects 11-1 |

16-2 Glossary Dutch-English

| | |
|---|--|
| kostprijsberekening | estimating dredging project costs 11-1 |
| kostprijzen sanerings processen | cost estimate processes remedial dredging 14-2 |
| kritieke dichtheid | density critical density 7-9 |
| kritische snelheid | critical velocity: influence of the concentration on 5-83 |
| kwaliteitsverhoging van zand in het wingegebied | quality improving of sand at the borrow area 15-4 |
| laadsnelheid sleepzuiger | loading rate hopper 6-7 |
| laadsysteem van sleepzuiger | loading system tshd 2-2-3 |
| ladderscharnier | pivoting point of the cutter ladder 2-1-5 |
| laden van de hopper | loading the hopper 2-2-8 |
| laminair | laminar: homogeneous laminar flow 5-66 |
| leegzuigen dmv sputten over de boeg | rainbow technique 3-5 |
| leegzuigen sleephopperzuiger | self emptying TSHD: optimising cycle-production 6-6 |
| leegzuigsytem | suction emptying system |
| leidingkarakteristiek | pipeline characteristics 5-90 |
| leidingtransport theorie | pipeline transport theory 5-55 |
| leidingtransport: invloed korrelgrootte | pipeline transport influence of the grain properties 5-59 |
| leidingweerstand grof zand | pipeline resistance for extremely coarse-grained material 5-84 |
| leidingweerstand heterogeen mengsel | pipeline resistance for heterogeneous soil-water mixtures 5-72 |
| leidingweerstand homogeen mengsel | pipeline resistance for homogeneous mixtures 5-64 |
| lier (zijdraad) | winch (side wire) 2-1-1 |
| lossen van zand onder water | discharging sand under water scaling 13-8 |
| maatgevend vacuum | vacuum the maximum allowable vacuum 5-29 |
| maatgevend vacuum en kritisch debiet | maximum vacuum and q-critical 5-96 |
| manometrische drukval | manometric head demand by the pipeline 5-94 |
| materiaaleigenschappen | material properties hopper loading 6-9 |
| Matousek: uitbreidung theorie Wilson | Matousek's expansion of wilson's two-layer theory. 5-87 |
| max rendement punt | best efficiency point bcp pump 5-21 |
| meedraaiend snijden | overcutting 2-1-12 |
| meervoudig echolood | multi beam echo sounder 8-16 |
| meervoudig staggered plaatsen van tanden | multi staggered tooth arrangement 2-1-11 |
| mengseldichtheid | mixture density 5-40 |
| mengseltroming door pijpleiding | mixture flow through a pipe 5-57 |
| mengselvorming | mixture formation 1-13 |
| mesvorm invloed bij snijden klei | blade shape: influence of the cutting blade in clay 4-3-8 |
| milieu baggerproject | environmental dredging projects examples 14-10 |
| milieubaggeren | remedial dredging 14-1 |
| milieuvriendelijk baggeren en saneringsbaggeren | environmentally safe dredging' and 'remedial dredging' 14-3 |
| milieu monitoring | environmental monitoring 3-6 |
| modder of slappe klei | soft clay or mud 15-1 |
| mors en vertroebeling | spillage and turbidity 14-4 |
| naaf | hub 2-1-8 |
| nabresmors | post-breaching spillage 2-1-5 |
| nauwkeurigheden | accuracies: calculating with 10-2 |
| netto positieve zuighoogte | net positive suction head; npsh 5-28 |
| Newtonse vloeistof | newtonian fluid in laminar zone 5-67 |
| nieuw baggerwerk | capital dredging 3-2 |
| normaal verdeelde bodemdiepte | Normal distributed bottom depth 10-6 |
| NPSH: cavitatie en maatgevend vacuum | NPSH: cavitation, npsh and maximum vacuum 5-26 |
| Nuttig gebruik slechte grond | beneficial use of low quality dredged material 15-2 |
| omgevingsfactoren bij hopperbelading | environmental factors hopperloading 6-16 |
| onbetaalde overdiepte berekening hoeveelheid | unpaid overdepth volume calculation 10-6 |
| onderhoudsbaggerwerk | maintenance dredging 3-1 |
| onderwaterplaatsbepaling | under water position systems. 8-10 |
| ontgraven | excavating and loosening 1-12 |
| ontgraven | excavation 4-1-1 |
| ontladen/leegzuigen | discharging the load tshd 2-2-10 |
| ontwateringswiel | drainage wheel |
| onwerkbare situaties | unworkable situations 12-1 |
| opspuiten en dumpen | depositing and dumping 1-14 |

16-2 Glossary Dutch-English

| | |
|--|---|
| opspuiten van zand | hydraulic filling ii 15-1 |
| opspuiten van land | reclamation 15-1 |
| optische plaatsbepaling sytemen | optical position fixing systems 8-2 |
| overdiepte: betaald en onbetaald | overdepth: paid and unpaid overdepth 10-1 |
| overloopverlies | overflow loss 6-8 |
| paalwagen | spud carriage 2-1-2 |
| persdruk | discharge pressure behind the pump 5-93 |
| personelekosten | crew expenses 11-7 |
| personelsopbouw | crew structure of a large csd and tshd 11-14 |
| P-L grafiek | production as a function of the discharge distance 5-109 |
| plaatsbepaling | position fixing 8-1 |
| plastisch snijproces klei | plastic cutting process in clay 4-3-2 |
| ploeg | plough 1-10 |
| plug flow | plugflow 5-68 |
| pomp en aandrijving | pumps and drive mechanisms 5-1 |
| pomp karakteristiek | pump characteristic. 5-11 |
| pompen in serie | dredge pumps in series on one suction dredger 5-103 |
| pompkarakteristiek: invoed aandrijving | pump characteristic influence of the drive mechanism 5-32 |
| poriegetal en -gehalte | porennumber e and pore content n 7-1 |
| poriewater | pore water rock: influence of 4-4-7 |
| P-Q diagram | production analysis by means of the P-Q diagram 5-111 |
| productie | production 5-108 |
| productieberekening cutterzuiger | production calculation for a CSD in clay 4-3-8 |
| productieberekening sleephopperzuiger | production capacity of TSHD 11-12 |
| productiekosten | production costs 11-4 |
| produktie bepalende factoren | production determining factors 1-17 |
| project kosten | project expenses 11-9 |
| projecten: foto-impressies | projects: photo impression of some dredging projects 3-6 |
| pruduktie winzuiger | production of a cutter suction dredger 2-1-16 |
| puntstuk | tongue / end piece 5-6 |
| radio plaatsbepaling sytemen | radio positioning systems 8-4 |
| regulator | regulator 5-34 |
| relatie grondmechanische eigenschappen en | relationship between soil properties and dredging processes 7-5 |
| relatieve dichtheid Dr | relative density Dr 7-3 |
| restlading sleephopperzuiger | restload trailing suction hopper dredger 6-2 |
| Rhee van ; 1DV en 2DV sedimentatiemodellen | Rhee's (van) 1dv and 2dv sedimentation models 6-26 |
| richtlijnen voor studie | study guidelines iv |
| rookgrens | fume limit 5-34 |
| rookgrens in P-Q diagram | fume limit in P-Q diagram |
| rooster | grating |
| rots clasificatie | rock classification on rock origin and formation 7-15 |
| rots snijden | cutting rock 4-4-1 |
| rotseigenschappen | rock properties 4-4-11 |
| schaalconcepten | scaling concepts 13-2 |
| schaalfactoren en -regels | scaling factors and scaling rules 13-2 |
| schaalmodelleren van baggerprocessen | scale modelling of dredging processes 13-1 |
| schaalproeven met baggermaterieel | scale tests with dredgers 13-11 |
| schaalregels baggerproces | scaling dredging processes 13-5 |
| scheurvorming in klei | crack forming cutting process clay 4-3-3 |
| scheurvorming in rots | crack formation in rock, effect waterdepth 4-4-9 |
| scheiden van fijne zand delen | segregation of fines 15-7 |
| schijf : draadschijf | pulley 2-2-2 |
| schijfbodemcutter | bottom disk cutter 1-6 |
| schijnbare concentratie | apparent transport concentration 5-63 |
| scholvormend snijproces | chip forming cutting process clay 4-3-3 |
| schuifvlak bij snijden klei | plane of shear forming cutting process clay 4-3-3 |
| schuifvlak bij snijden zand | plane of shear in sand 4-1-9 |
| Schuifvlakhoek β (zand) | Shearplane angle β (sand) 4-1-10 |
| Shields parameter | Shields parameter 4-2-14 |

16-2 Glossary Dutch-English

| | |
|---|---|
| sleepopperzuiger | trailing suction hopper dredger (tshd) 2-2-1 |
| sleepkop | drag head 2-2-4 |
| slijtage | wear 7-9 / 11-6 |
| slijplaat / voeringplaat | wear plate 5-6 |
| slijtvlek van een tand | wearing surface of a tooth 2-1-17 / 4-4-3 |
| sneebreedte; 'minimale'-snelheidsmeting met meetlat | width of cut ; 'minimum' 2-1-6 |
| snijkop | flow velocity measuring stick 5-56 |
| snijkopaandrijving | cutterhead 2-1-8 |
| snijkopzuiger | cutterhead drive 2-1-14 |
| snijproces in rots | cutter suction dredger (csd) 2-1-1 |
| snijproces in zand | rock: cutting process in rock 4-4-1 |
| snuiver | sand: cutting process in sand 4-1-1 |
| specifieke energie van rots | sniver 15-14 |
| specifieke energie zand | specific energy of rock 4-4-13 |
| stabiliteit | specific energy: cutting sand 4-1-18 |
| stabiliteit van het talud van een winput | stability 7-6 |
| stormvloedkering | slope stability suction pit 15-3 |
| stort , open of gesloten | storm surge barrier rotterdam 3-2 |
| stortgoot boven het beun | fill area , open or closed 15-5 |
| stort kade | chute above hopper 6-3 |
| stortkade onder water | bund at fill area15-6 |
| stortkist | containment bund under water 15-9 |
| strandsuppletie | weir box 15-8 |
| strandsuppletie kostprijsberekening | beach nourishment 15-6 |
| survey resultaten | cost estimation: sample costing of beach nourishment. 11-10 |
| survey: positiebepaling en dieptebeleid | survey results: the presentation of survey results 8-19 |
| suspensieparameter S | survey: position fixing and depth measurement 8-1 |
| taludautomaat | suspension: determining the suspension parameter S 14-7 |
| taluhelling zandopsuiting onder en boven water | automatic 'slope profiler' 2-1-6 |
| tandwisseltijd, berekening optimum | fill slope under and above water15-11 |
| tds voorbeeld | tooth changing time interval , calculation optimum 2-1-24 |
| tegendraaiend snijden | tds example calculation 9-4 |
| toerental n | undercutting 2-1-12 |
| tolerantie | rotational speed n pump 5-16 |
| toleranties voorbeelden | tolerances 10-1 |
| tonnen droge stof systeem | examples tolerances 10-3 |
| transportband | tons dry solids (tds) production measurement system 9-1 |
| transportconcentratie | conveyor belt |
| transportfacor | transport concentration 5-62 |
| trossentrek | transport factor 5-62 |
| turbine luchtinjectie | bollard pull 2-2-5 |
| tussenstation positie | turbocharger 5-34 |
| uitleveringsfactor | booster position 5-103 |
| vacuum | bulking factor 7-2 |
| vacuum limiet | vacuum 5-27 |
| vacuum aan zuigzijde pomp | vacuum limit 5-111 |
| vacuum productielimiet | vacuum demand at the suction side of the pump 5-90 |
| valsnelheid van een korrel | vacuum: influence of the available vacuum on the production 5-108 |
| variabele overloop | fall velocity w of a grain 5-59 |
| veen | variable overflow: optimising cycle-production 6-5 |
| verdichting in de diepte | peat |
| verdichting dynamisch/explosive | vibratory compaction 15-13 |
| verdichtingsgraad | compaction dynamic/explosive 15-13 |
| vermogen of koppel begrenzing | compaction , degree of 7-5 |
| vermogen of koppel begrenzing | limitation by maximum power or torque of the drive mechanism 5-97 |
| versprongen tandplaatsing | power: characteristics for constant power and torque pump 5-22 |
| verstopping | staggered teeth positioning 2-1-10 |
| | blockage 1-13 |

16-2 Glossary Dutch-English

| | | |
|---|---|---------------------------|
| vertroebeling | turbidity: maximum requirements on turbidity | 14-9 |
| vervormingssnelheid | deformation rate: influence of in clay | 4-3-7 |
| verwering van rots | weathering of rock | 7-17 |
| verzadigingsgraad | degree of saturation | 7-1 |
| verzadigingsgraad | saturation: degree of saturation | 7-1 |
| verzekerkosten | insurance expenses | 11-8 |
| volbrandstof gebied | full fuel zone | 5-35 |
| volkomen overlaat | free fall weir | 6-18 |
| volume concentratie | volumetric concentration | 5-61 |
| voluut | volute/spiral gap:space between pump-blade and pump-housing | 5-6 |
| voorwoord | foreword | i-iii |
| waaierblad of -schoep | vane / blade | 5-6 |
| waaier diameter | impeller diameter d and width b | pump 5-18 |
| walletjes snelheid formule | headwall velocity | formula 4-2-6 |
| water injectie baggeren met sleepzuiger | water injection dredging using a tshd | 2-2-12 |
| waterdraaien limitering persdruk | limitation by hman when pumping water | 5-98 |
| watergehalte | water content | 7-2 |
| waterjet theorie | waterjet theory | 1-18 |
| waterring pomp | liquid ring pump | 5-4 |
| water overspanningsmeter op het stort | water overpressure gauge at reclamation area | 15-5 |
| waterspanningen in rots | hydrostatic pressures rock: influence of | 4-4-7 |
| waterstraalbaggeren | flow dredging | 1-11 |
| waterstraalpomp theorie | water jet pump theory (ejector pump) | 5-49 |
| weekproductie | weekly production costs for main plant | 11-9 |
| wegenbouw opspuit project | Road project reclamation | 15-10 |
| werkbaarheid | workability | 12-1 |
| werkbaarheid berekening | workability determining the workability | 12-7 |
| werkbaarheid inschatting | estimate of uptime using the wave scatter diagram | 12-7 |
| werkbaarheidsinschatting mbv Monte Carlo | estimate of project durations using monte carlo simulation | 12-9 |
| werkgebied bij centrifugaalpomp | working range with the working points | 5-95 |
| werkmethode snijkopzuiger | working methods csd | 2-1-3 |
| werkpunten bij centrifugaalpomp | working points of a centrifugal pump. | 5-8 |
| werkpunten interactie pomp en pijpleiding | interaction between pump and pipeline | 5-89 |
| wetenschappen gerelateerd aan baggeren | sciences related to dredging | 1-16 |
| Wilson: leidingweerstand formule | Wilson pipeline resistance according to | 5-81 |
| win-/zuiggebied | borrow area | 15-2 |
| wormwielzuiger | auger dredger | 1-7 |
| Yagi: 1 D sediment diffusiemodel. | Yagi's one-dimensional sediment-diffusion model | 6-21 |
| zakkens | settlement beacons | 15-5 |
| zand snijden | cutting sand | 4-1-1 |
| zand vang | silt trap | 15-8 |
| zandwinput | sand pit production practical considerations | 4-2-11 |
| zuigbocht | trunnion bend | in suction tube TSHD 2-20 |
| zuigbuis | suction tube | 1-13 |
| zuigformule | suction formula | 5-92 |
| zuigmond | suction mouth | 2-1-1 |
| zuigproductie in zandwinput | sandpit suction production | 4-2-8 |
| zwaaiboog cutterzuiger | arc of swing CSD | 2-1-2 |
